Chad Statement on ratification

Thank you Mr. Coordinator

Chad is one of the countries highly affected by mines and UXOs including Cluster munitions. In fact UXO, including Cluster Munitions cause more accidents than mines, therefore, it is in the interest of Chad to sign and ratify the Convention on Cluster Munitions.

Today I would be glad as a signatory State to announce that the Parliament of Chad has ratified the Convention on Cluster munitions and signed by the president as the process requires.

It is on its final process of depositing the instrument of ratification with the UN Secretary General through the Permanent Mission of Chad to the UN.

Thank you for your attention
