

Czech republic thanks for the opportunity to present new elements that appeared in the last reporting of the Czech republic, namely in accordance with article 3 in the form C of the report. The report covering the period from the 1st September till 31st December 2012 was submitted last week. The previous period was covered by the intial report. I would like to emphasize that important change contained in the report is the considerable decrease in the retained explosive submunition by almost a half of the total number. The Czech republic destructed 185 explosive submunition in the process of training of the EOD personnel. Currently, the Czech republic retains 293 explosive submuniton for the training purposes only. Thank you for your kind atention
