

Convention on Cluster Munitions
Intersessional meetings 2013
Norwegian statement on implementation of Article 4

Thank you Mr Coordinator,

Norway has obligations under Article 4 to clear and destroy cluster munition remnants on its territory, namely in and around the former test firing range at Hjerkinn in central Norway.

The Ministry of Defence is responsible for clearance of this area, and they estimate that clearance will be complete no later than 2013. This is in line with what we have reported earlier. Norway will keep States Parties and others informed of the progress of this operation.

Thank you.
