Mr. President,

I have the honor to speak on behalf of the European Union.

The Candidate Countries the Republic of North Macedonia*, Montenegro*, Serbia* and Albania*, the country of the Stabilisation and Association Process and potential candidate Bosnia and Herzegovina, and the EFTA country Iceland, member of the European Economic Area, as well as the Republic of Moldova align themselves with this statement.

The EU congratulates the Swiss Presidency on the assumption of its important role at the Second Review Conference of the Cluster Munitions Convention and assures you, Mr. President, of its full support to achieve a successful and action-oriented outcome. We commend the Presidency’s resourcefulness and continued efforts to move forward despite the unprecedented circumstances presented by the COVID-19 pandemic, and we fully support the compromise decision of holding meetings in two parts. We hope that the public health situation will allow a safe, in-person meeting of the Review Conference in February 2021, with a view to adopting substantive decisions, including future-oriented actions. We call on States Parties to the Convention to make further progress with the implementation of the Convention. As Under-Secretary-General and High Representative for Disarmament Affairs Ms. Izumi Nakamitsu said: “the work of disarmament, like the response to COVID-19, is a global project in which we each share the deepest stake”.

At the outset, let me recall that the EU supports the humanitarian goal of the Convention on Cluster Munitions. We are deeply concerned by the impact on civilian populations of the indiscriminate use of cluster munitions, including the extensive use of cluster munitions in Syria, as well as uses in Yemen, Libya and most recently in the Nagorno-Karabakh conflict. The EU strongly condemns such

use and calls upon all actors to refrain from such use and to fully adhere to International Humanitarian Law.

We consider that at the 10th anniversary of the entry into force of the Convention, the Review Conference provides an opportunity to assess achievements and progress since the Dubrovnik Action Plan in 2015 and to agree on a new plan for States Parties to implement their outstanding obligations under the Convention.

The EU supports your efforts aimed at adopting several outcome documents and we agree that a robust action plan would serve as a key guide for States Parties in realizing the objectives set forth in the Convention for the next five years. Similar to the methodology of the recently adopted Oslo Action Plan of the Anti-Personnel Mine Ban Convention, we advocate the idea of introducing a set of actions and indicators to make the objectives more measurable. Where possible, we support efforts to seek synergies in the implementation of the Convention on Cluster Munitions with the Anti-Personnel Mine Ban Convention, especially on victim assistance, clearance, and survey. Where applicable, coordination on issues of victim assistance and international cooperation with other disarmament conventions contributes to the development of common and more efficient and effective approaches, and guiding principles. Given that cluster munitions affect men, women, boys and girls in different ways, we also wish to see dedicated action on mainstreaming gender perspectives within the Convention as well as a specific thematic section dedicated to risk education. The principles of inclusiveness and non-discrimination by involving all stakeholders in an inclusive and integrated approach to victim assistance remain key for the European Union.

Since last year, four new States have become States Parties to the Convention. The EU welcomes the latest accession by São Tomé and Príncipe, Niue, the Maldives, and St. Lucia, bringing the number of State Parties to 110. However, we are yet to meet the target of 130 States Parties that was set for 2020 by the First Review Conference in Dubrovnik in 2015.

We appreciate that there have been positive developments in the implementation of the Convention by States Parties. Most notably, we congratulate Montenegro and Croatia for clearing all cluster munition remnants (CMR) on their territories in accordance with the provisions of Article 4 of the Convention. We also positively note that with the exception of the two most heavily contaminated States Parties - Lao PDR and Iraq-, the remaining affected States Parties should be in a position to fulfil their Article 4 obligations by the CCM Third Review Conference in 2025. We applaud the
global efforts that, in the past decade, led to major cluster munition clearance and submunitions destruction. In particular, 2019 saw a significant increase in the area cleared of cluster munition remnants and in the number of destroyed submunitions.

Enhanced ownership by affected States and improved coordination between donors and other stakeholders are essential to make our work as effective and sustainable as possible and promote the objectives of the Convention. In this context, the EU recalls the establishment of Country Coalition Concept by Germany at the 7th Meeting of States Parties, which provides a useful vehicle to enhance cooperation and coordination among all stakeholders in a particular country and to tailor assistance to the specific needs and challenges faced by an affected State. We strongly encourage the set-up of country coalitions to support States Parties fulfilling their time bound obligations under the Convention. We express our appreciation for partners from across the sector – including United Nations entities, the ICRC, mine action operators and civil society – who are in the front line in ensuring effective implementation of the Convention, through their efforts in clearance, stockpile destruction, risk education, victim assistance and advocacy.

Mr. President,

The EU values the humanitarian aspects of the Convention and commits to mine action, which addresses explosive remnants of war (ERW) including cluster munition remnants. As the world’s leading humanitarian donor, the EU and its Member States continue to provide significant funding to mine action especially in the fields of risk education, clearance, stockpile destruction, and victim assistance. A number of EU funded projects contribute to the socio-economic reintegration of victims impacted by mines and ERW, including cluster munitions. For example, the EU has funded projects aimed at creating employment opportunities for and providing vocational training to survivors.

Before concluding, we must say that we are concerned with the impact of the recurrent financial deficit of the Convention, which has at times resulted in the absence of interpretation services and delays in the translation of documents. The sole structural solution resides in the observance by all participating States of their financial obligations. The payment of annual contributions in full and on time is part of the commitment of each State Party to the objectives of the Convention on Cluster Munitions. Without it, some objectives of the Convention may remain elusive.

Thank you, Mr. President
